Roll No. ☐☐☐☐☐ Total No. of Pages : 02

Total No. of Questions : 13

B.Pharmacy (Sem.–1)

PHARMACEUTICAL INORGANIC CHEMISTRY

Subject Code : BP-104T

M.Code : 74647

Date of Examination:29-12-2023

Time : 3 Hrs. Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and students have to attempt any SEVEN questions.

SECTION-A

1. Write in brief about the following :

a) Which apparatus and chemical reaction is involved in limit test for iron?

b) Write formula and medicinal uses of chlorinated lime and boric acid.

c) What is buffer capacity and isotonicity?

d) What are poisons? What is antidote for cyanide poisoning?

e) What are the medicinal uses of aluminum hydroxide gel and calcium carbonate?

f) What is kaolin and Attapulgite?

g) Give the composition and method of preparation of Iodine tincture.

h) Write composition and uses of Oral Rehydration Salt (ORS).

i) Define the purpose of limit test in pharmaceuticals.

j) Give the precautionary measure required to handle radioactive substances.

SECTION-B

2. Explain the principle, apparatus and procedure involved in the limit test of arsenic.

3. Write a detailed note on Zinc eugenol cement and role of fluoride in dentifrices.

4. Discuss medicinal uses and mechanism action of antimicrobials and expectorants.

SECTION-C

5. Write the construction, working principle of the Geiger-muller counter.

6. Explain the method of preparation and assay of Ammonium chloride.

7. Classify antacids with examples. Add a note on combination antacid therapy.

8. Write a note on acidifiers and activated charcoal.

9. Discuss principle and chemical reaction involved in limit test for sulphate.

10. Describe the physiological mechanism of acid-base balance in the body.

11. What are Heamatinics? Write the preparation and assay of ferrous sulphate.

12. Classify cathartics. Write in detail about sodium orthophosphate.

13. Give the principle and reaction involved in the assay of Calcium gluconate.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
