Total No. of Questions : 13

B.Pharma (Sem.–3)

PHARMACEUTICAL ORGANIC CHEMISTRY-II

Subject Code : BP-301T

M.Code : 75105

Date of Examination : 12-12-22

Time : 3 Hrs. **Max. Marks : 75**

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and students have to attempt any SEVEN questions.**

SECTION-A

1. Answer briefly :

a) What is principle involved in iodine value?

b) Give any two reactions of phenanthrene.

c) Give the structure and uses of cresol.

d) Convert-benzene to p-Nitrotoluene.

e) Write any two limitations of Bayer's strain theory.

f) Give the mechanism of Friedel craft alkylation reaction.

g) What is coulson motiff theory?

h) Give the basicity order of aniline, p-nitroaniline and m-nitroaniline.

i) Write any one method of preparation of tritane.

j) What are drying oils?

SECTION-B

2. What are the various analytical constants used to check the quality of Fats and Oils? Define them. Mention the significance and principle involved in their determination.

3. What-are Ary-l-Diazonium-compounds? Justify their stability in comparison to alky diazonium salts and enumerate various synthetic uses of benzene diazonium salt.

4. Comment in detail upon effect of substituent upon reactivity and orientation of monosubstituted benzene compounds.

SECTION-C

5. Classify polynuclear hydrocarbons. Give the structure of the compounds belonging to each class.

6. What is Reimen tiemen reaction? Write its detailed mechanism.

7. Comment upon hydrolysis and hydrogenation of Fats.

8. Enumerate various qualitative tests carried out for the detection of phenols.

9. Explain with evidence the mechanism of electrophillic substitution reaction of benzene.

10. Write down various methods for synthesis and reactions of benzoic acid.

11. Give various postulates of Bayer's strain theory. Write its limitations.

12. Define aromaticity. Give various conditions to be fulfilled by an organic compound to possess aromaticity.

13. Write down various methods of synthesis of cyclopropane.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
