Total No. of Questions : 13

Total No. of Pages : 02

B.Pharmacy (Sem.-2)

PHARMACEUTICAL ORGANIC CHEMISTRY-I

Subject Code : BP-202T

M.Code : 74968

Date of Examination: 08-01-2025

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

I. **Briefly write about the following:**

a) Give uses of paraffins.

b) What is Diels Alder reaction?

c) Comment upon the stability of carbanions.

d) Give the structures of two medicinally important alkyl halides.

e) What are Metamers?

f) Write down crossed cannizaro reaction.

g) Give chemical test to identify presence of alcohol.

h) Give the structure and uses of lactic acid.

i) Write any two methods of preparation of alkenes.

j) How many isomers are possible for C_4H_8O. Give their chemical names.

SECTION-B

2. **Comment upon :**

   a) Benzoin condensation

   b) Effect of substituent on acidity of carboxylic acids.

3. Give detailed note on different types of mechanisms involved in the nucleophillic substitution reactions of alkyl halides. Compare the two in detail and write down the factors affecting these mechanisms.

4. **Account for the following :**

   a) Halogenation of alkanes

   b) Structural isomerism in organic compounds.

SECTION-C

5. Explain the markonikoff"s and anti-markonikoff rule.

6. Write down various reactions of alcohols.

7. Classify organic compounds. Write down atleast one chemical reaction of each class.

8. Elaborate upon qualitative tests used to identify and to distinguish between various types of amines.

9. Write about the effect of base and solvent on El and E2 reactions.

10. What is the structure and uses of Chloral hydrate and vanillin?

11. Describe various methods of preparation of carbonyl compounds.

12. Give chemical tests to identify the presence of ethanoic acid, acetaldehyde and methylacetate.

13. Comment upon hybridisation in alkanes.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
