Total No. of Pages : 02

Total No. of Questions : 13

B.Pharmacy (Sem.–3)

PHARMACEUTICAL ORGANIC CHEMISTRY-II

Subject Code : BP-301T

M.Code : 93323

Date of Examination : 08-12-2023

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and students have to attempt any SEVEN questions.

SECTION-A

1. **Answer briefly :**

a) How many number of isomers are possible for disubstituted benzene?

b) Which theory explains the stability of larger rings?

c) Give the structure and uses of Resorcinol.

d) Comment upon the stability of Aryl diazonium salts.

e) Define Acid value.

f) What is the product formed when phenol is reacted with concentrated Nitric acid?

g) Write any two methods for the synthesis of Tritane.

h) Give two reactions of cyclopropane.

i) Write any one method for the synthesis of aniline.

j) Define Rancidity.

SECTION-B

2. Write a detailed note on the various methods of synthesis and reactions of Benzoic acid. Compare its acidity with aliphatic acids.

3. Explain the analytical, synthetic and other evidences in the derivation of structure of benzene.

4. **Comment upon :**

   a) Haworth synthesis

   b) Bayer's strain theory.

SECTION-C

5. Comment upon the oxidation reactions of Anthracene.

6. Give the mechanism of sulphonation of benzene.

7. What is Fries rearrangement? Give its mechanism.

8. Explain different methods for the synthesis of cycloalkanes.

9. Give the structure and uses of DDT and Chloramine.

10. Give the reactions of diazonium salts involving evolution of nitrogen.

11. What are polynuclear hydrocarbons? Classify them.Give examples of each class.

12. Give significance and principle involved in the determination of Saponification value.

13. Write down the mechanism of electrophillic substitution reactions of benzene.
