Total No. of Questions : 13

B.Pharmacy (Sem.–3)

PHARMACEUTICAL ORGANIC CHEMISTRY-II

Subject Code : BP-301T

M.Code : 75105

Date of Examination : 04-01-2024

Time : 3 Hrs. Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and students have to attempt any SEVEN questions.

SECTION-A

1. **Answer briefly :**

   a) Define Huckel Rule.

   b) What will be the product obtained when i) chorobenzene is nitrated and ii) Toluene is chlorinated.

   c) Give the structure and uses of naphthol.

   d) Comment upon the stability of Aryl diazonium salts.

   e) Define RM value.

   f) Which theory explains the stability of cyclopropane?

   g) Write any two methods for the synthesis of Triphenylmethane.

   h) Define Saponification Value.

   i) Give acidity order of formic acid, acetic acid and benzoic acid.

   j) Compare the basicity of aliphatic amine with aromatic amine.

SECTION-B

2. Write a detailed note on the various reactions of Fatty acids. Comment upon hydrolysis and rancidity of oils.

3. Give methods of preparation of Benzoic acid. Explain in detail the acidity of variedly substituted Benzoic acid derivatives.

4. Discuss in detail the effect of substituent on reactivity and orientation of monosubstituted benzene compounds towards electrophillic substitution reactions.

SECTION-C

5. Give various methods of synthesis and reactions of cyclobutane.

6. Give the mechanism of Friedel craft reactions of benzene.

7. Write down mechanism of Reimer Tiemann and Kolbe reactions.

8. Explain Bayers strain theory. Give its limitations.

9. Give the structure and uses of resorcinol and BHC.

10. Give the reactions of diazonium salts involving evolution of nitrogen.

11. What are isolated polynuclear hydrocarbons? Give various methods for their synthesis.

12. Give the significance and principle involved in the determination of acid value of fatty acids.

13. Comment upon complete chemistry of phenantharene.
