Roll No. | | | | | | | | | | |

Total No. of Pages : 02

Total No. of Questions : 13

B.Pharmacy (Sem.–3)

PHYSICAL PHARMACEUTICS-I

Subject Code : BP-302T

M.Code : 75106

Date of Examination : 13-06-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. **Define briefly :**

   (a) Define latent heat of vaporization.

   (b) Define buffer capacity.

   (c) What is Steady state of diffusion?

   (d) Define saturated solution.

   (e) Define solubility parameter.

   (f) Define tie line.

   (g) Define chelates.

   (h) Define dielectric constant.

   (i) Define coordination number.

   (j) What are buffered isotonic solutions?

SECTION-B

2. Define Raoult's law. With help of a neat labelled diagram explain positive and negative deviation from Raoult's law.

3. Define distribution law. Explain the effect of dissociation and association of solute on distribution coefficient.

4. Define refractive index. How is it determined experimentally?

SECTION-C

5. Describe Du Nouytensiometer method of determination of interfacial tension.

6. Explain Fick's law of diffusion.

7. What is specific refraction and molar refraction?

8. Explain two methods used for the adjustment of isotonicity.

9. Write a note on polymorphism.

10. Explain the factors which influence solubility of gas in liquids.

11. Write a note on aerosols.

12. What are liquid crystals? How are they formed?

13. What is the role of dissociation constant in absorption of drugs?

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
