B.Pharmacy (Sem.–3)

PHARMACEUTICAL MICROBIOLOGY

Subject Code : BP/303T

M.Code : 75107

Date of Examinaiton : 15-06-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. **Answer briefly :**

(i) Give two examples of preservatives.

(ii) What are Eukaryotes?

(iii) What is meant by log-phase in bacterial growth curve?

(iv) Mention the conditions required for growing anaerobic bacteria.

(v) What is meant by 'class 10' room?

(vi) Give examples of two materials sterilized by gaseous sterilization.

(vii) What are transformed cell cultures? Give two examples and their uses.

(viii) Mention the key features of Fungi.

(ix) What is meant by 'laminar flow'?

(x) Mycobacteria and many Nocardia sp. can be identified by which stain?

SECTION-B

2. Enlist different types of microbial contaminants and the factors affecting preservation of pharmaceutical products. Briefly explain the methods of assessing preservation.

3. Write a note on disinfectants and discuss their mechanisms of action. Describe the tests used for evaluating them.

4. Classify fungi. Discuss their reproduction, and cultivation. Give examples of disease-causing fungi.

SECTION-C
