Total No. of Questions :13

B.Pharmacy. (Sem.–3)

PHARMACEUTICAL ORGANIC CHEMISTRY-II

Subject Code :BP301T

M.Code : 93323

Date of Examination : 11-06-2024

Time : 3 Hrs. Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. Write briefly :

   (i) Give structure and uses of saccharine.

   (ii) What are the limitations of Friedel Craft alkylation?

   (iii) What is the effect of NO_2 group on acidity of hydroxyl group in picric acid?

   (iv) Why nitro group deactivates benzene for electrophilic substitution?

   (v) What is ferric chloride test for phenol?

   (vi) Why p-nitro benzoic acid is weaker than o-nitrobenzoic acid.

   (vii) Define saponification value.

   (viii) Differentiate between oils and fats.

   (ix) Give Friedel Craft acylation of benzene by succinic anhydride in Howarth synthesis of naphthalene.

   (x) Draw five resonance forms of phenanthrene.

SECTION-B

2. Describe the facts that support the kekule formula of benzene.

3. Discuss basicity of aniline and effect of substituents on basicity.

4. What are the limitations of theory? Give detailed account of conformational analysis of cyclohexane.

SECTION-C

5. Explain the ortho, meta and para directing effect of substituents in mono substituted benzene.

6. Why Friedel Craft acylation preferred over Friedel Craft alkylation in alkylation of benzene?

7. Discuss the effect of substituents on acidity of benzoic acid.

8. What is the principle and significance of determination of Reichert Meissl value?

9. Explain electrophilic substitution reactions of naphthalene.

10. Give orbital picture of anthracene along with resonance structure.

11. Discuss activation and deactivation of benzene ring in mono substituted derivatives for electrophilic substitution.

12. Write a note on drying of oils.

13. Give synthesis of phenanthrene.

Gian College of Pharmacy LIBRARY Landran (Mohali)

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
