Total No. of Questions : 13

B.Pharmacy (Sem.–3)

PHARMACEUTICAL ORGANIC CHEMISTRY-II

Subject Code : BP-301T

M.Code : 75105

Date of Examination: 16-12-2024

Time : 3 Hrs. Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and students have to attempt any SEVEN questions.**

SECTION-A

1. **Answer briefly:**

a) Which analytical constant states about the unsaturation in Fatty acids? Define it.

b) Give any two reactions of Anthracene.

c) What are the limitations of Friedel craft alkylation reactions?

d) Comment upon coupling reaction of diazonium salts.

e) Write any two limitations of Bayer's strain theory.

f) Write any two tests for detection of phenols.

g) What is Coulson motiff theory?

h) Give the structure and uses of DDT.

i) Write any two methods of preparation of Diphenylmethane.

j) What are drying oils?

SECTION-B

2. Give various methods for the preparation and chemical reactions of cycloalkanes.

3. What are Aryl Diazonium compounds? Justify their stability in comparison to alky diazonium salts and enumerate various synthetic uses of benzene diazonium salt.

4. Elaborate on various electrophilic substitution reactions of benzene by giving the detailed mechanism of any one. Discuss in detail the effect of substituents on the reactivity of these reactions.

SECTION-C

5. Comment upon the orientation and reactivity of chlorobenzene towards electrophillic substitution reactions.

6. Give the significance and principle involved in the determination of saponification value of fatty acids.

7. Explain the effect of substituent on acidity of benzoic acid.

8. Comment upon hydrolysis and hydrogenation of Fats.

9. Enumerate various methods utilised for the synthesis of phenols.

10. Write down various methods for synthesis and reactions of Aniline.

11. Write a detailed note on synthetic methods of naphthalene.

12. Define aromaticity. Give various conditions to be fulfilled by a organic compound to possess aromaticity.

13. Write a detailed note on chemistry of isolated polynuclear hydrocarbons.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
