Total No. of Pages : 02

Total No. of Questions : 13

B.Pharma (Sem.-4)

PHYSICAL PHARMACEUTICS-II

Subject Code : BP-403T

M.Code : 75845

Date of Examination : 14-12-2023

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.**

SECTION-A

1. **Write short notes on :**

   a) Molecular dispersions

   b) Amphiphilic colloids

   c) Rheology

   d) Fluidity

   e) Bulk density

   f) Stokes diameter

   g) Wettability

   h) Sedimentation volume

   i) Molecularity

   j) Shelf life.

SECTION-B

2. Discuss in detail the non-Newtonian systems with examples.

3. Write an explanatory note on the various theories of emulsions. Highlight the importance of preservation of emulsions .

4. Discuss in detail the physical and chemical factors influencing the degradation of pharmaceutical products.

SECTION-C

5. Describe the kinetic properties of colloids.

6. Write a note on pharmaceutical applications of colloids.

7. Highlight the importance of selection of viscometer for determination of rheologic properties.

8. Write a note on interfacial properties of suspended particles.

9. Write a note on the methods for determining particle size .

10. Highlight the importance of determination of density of particle in pharmaceutical industry.

11. Describe the factors that influence the solid-state chemical kinetics .

12. What do you understand by plastic and elastic deformation.

13. Highlight the significance of HLB in emulsion formation.
