Total No. of Questions : 13

Total No. of Pages : 02

B.Pharmacy (Sem.-4)

PHARMACEUTICAL ORGANIC CHEMISTRY-III

Subject Code : BP/401 T

M Code : 75843

Date of Examination : 07-05-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. **Write short notes on :**

   a) Define stereoisomerism with an example.

   b) Explain entantiomerism. Give one example.

   c) Define asymmetric carbon atom and give the formula to calculate isomeric forms.

   d) Write the possible stereoisomers of 2,3-Dichlorobutane.

   e) What are meso compounds? Give an example.

   f) Write chemical structures with numbering of Pyrazole and Acridine.

   g) Outline Skraup synthesis of Quinoline.

   h) Write structure and medicinal uses of drug containing azepine.

   i) Define stereoselective example with suitable example.

   j) Enlist important applications of oppenauer-oxidation reagent.

Chandigarh Lancaran

SECTION-B

2. Define geometric isomers. Give various methods of determining configuration of geometrical isomers.

3. Write mechanism involved in Beckmann's rearrangement and Claisen-Schmidt rearrangement.

4. Discuss aromaticity and reactions of Furan, Thiophine and also give reason for basicity of Pyridine.

SECTION-C

5. Write in detail about RS system of configuration.

6. Discuss the various conformational isomers of cyclohexane.

7. Explain the stereochemistry of biphenyls and conditions required for optical activity.

8. Discuss in short Asymmetric synthesis and Racemic modification.

9. Discuss Paal-Knoor synthesis and various medicinal uses of Pyrrole.

10. Write synthesis and important reactions of Indole.

11. Write chemical synthesis and medicinal significance of Imidazole nucleus.

12. Write briefly about Wolff-Kishner reduction and birch reduction.

13. Write down brief note on Dakin reaction and its synthetic applications.
