Total No. of Pages : 02

Total No. of Questions : 13

B.Pharmacy (Sem.-4)

PHYSICAL PHARMACEUTICS-II

Subject Code : BP/403T

M.Code : 75845

Date of Examination : 14-05-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. Answer briefly :

   a) What do you mean by pseudoplastic flow?

   b) What is peptization?

   c) Give SI unit of kinematic velocity.

   d) What is heckel equation?

   e) Define thixotropic flow.

   f) What do you understand by stroke's law?

   g) Enlist methods to determine the viscosity.

   h) What is specific surface area?

   i) What is dielectric constant?

   j) What is second order reaction? Give its equation.

SECTION-B

2. Enlist different methods for determining the particle shape of solids. Describe any one in detail with its limitations.

3. What is thixotropy and anti-thixotropy? Give examples and explain the use of these properties of polymers in dosage form design.

4. What is HLB? Explain the importance of HLB value in formulating a stable emulsion system.

SECTION-C

5. Differentiate between Newtonian and Non-Newtonian flow of fluids. Explain Non-Newtonian fluid flow with examples.

6. Write a note on emulsifying agents giving suitable examples.

7. Explain plastic and elastic deformation in solids and correlate with Heckel Plot.

8. Describe the difference between a deflocculated and flocculated suspension. Discuss the role of structured vehicles in formulating a physically stable suspension.

9. Explain in detail about second order reaction.

10. What are the physical factors influencing degradation of pharmaceutical products?

11. Write a note on adsorption and its applications.

12. Mention the parameters to be evaluated for assessing stability of suspensions.

13. Discuss flocculation phenomena and its advantages while formulating a stable suspension.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
