Roll No. | | | | | | | | | | |

Total No. of Questions : 13

Total No. of Pages : 02

B.Pharmacy (Sem.-4)

PHYSICAL PHARMACEUTICS-II

Subject Code : BP403T

M.Code : 75845

Date of Examination: 14-12-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. **Answer briefly:**

   a. Types of colloidal systems

   b. Zeta potential

   c. Thixotropy

   d. Pseudoplastic flow

   e. Specific surface

   f. Porosity

   g. Sedimentation theory

   h. Controlled flocculation

   i. Ionic strength

   j. Photolytic degradation

SECTION-B

2. Describe in detail the factors affecting solubilization capacity of surfactants with examples.

3. Discuss in detail the flocculated and deflocculated suspensions with examples.

4. Write an explanatory note on the methods to determine surface area.

SECTION-C

5. Classify the colloidal dispersions on the basis of the size.

6. Explain the concept of negative thixotropy with examples.

7. Write a note on falling sphere viscometer.

8. Describe the rheological properties of emulsions.

9. Illustrate the important derived properties of powders.

10. Explain the significance of accelerated stability testing.

11. Describe the influence of ionic strength and pH on reaction rate.

12. Write a note on optical properties of colloids.

13. Differentiate between Newtonian and non-Newtonian fluids.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
