Total No. of Pages : 02

B.Pharmacy (Sem.-5)

MEDICINAL CHEMISTRY II - THEORY

Subject Code : BP501T

M.Code : 76786

Date of Examination : 17-05-2023

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.**

SECTION-A

1. **Write briefly :**

   a) Draw structure, give IUPAC name and the uses of Levocetrizine.

   b) What are H_2 receptor antagonists?

   c) Draw structures and give IUPAC names of any two Purine based antimetabolite class of anticancer agents.

   d) What is the importance of ACE inhibitors in the cardiovascular disorder?

   e) What are potassium sparing diuretics?

   f) What is the importance of selectivity of compound towards β_2 receptor blocking over β_1?

   g) Name any four drugs used in the treatments of CHF.

   h) What are glucocorticoids?

   i) What are glucosidase inhibitors?

   j) What are glitazone?

[529] 232

SECTION-B

2. What are the limitations of anti-neoplastic agents? Classify these by citing **at least two** structural examples of each class.

3. Classify anti-hypertensive agents with examples. Give synthesis and uses of methyldopa hydrochloride.

4. Classify steroidal hormones giving structure of naturally occurring member and typical structure of each class.

SECTION-C

5. Draw the structure of histamine and comment on distribution of histamine receptors in human body.

6. Give the synthesis and important uses of diphenhydramine hydrochloride and promethazine hydrochloride.

7. What are carbonic anhydrase inhibitors? Give uses and synthesis of acetazolamide.

8. What are anticoagulants? Give IUPAC name and synthesis of warfarin.

9. Write a short note on anti- thyroid drugs.

10. Write a short note on selective phosphodiesterase enzyme -5(PDE5) inhibitors.

11. Give IUPAC name, synthesis and uses of tolbutamide.

12. Describe amino benzoic acid-class of local anaesthetics giving synthesis of benzocaine.

13. Discuss calcium channel blockers which are used as anti-anginal drugs.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
