Total No. of Questions : 13

B.Pharmacy (Sem.-5)

PHARMACOGNOSY AND PHYTOCHEMISTRY II-THEORY

Subject Code : BP504T

M.Code : 76789

Date of Examination : 20-06-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.
2. SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.
3. SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.

SECTION-A

1. Answer briefly :

   a) What are True and pseudo Tannins?

   b) Name the biosynthetic pathways by which lignans and steroids are biosynthesized.

   c) Give principle of Ultrasound assisted extraction method.

   d) Which method of extraction would you prefer for extraction of glycosides from plants?

   e) Give 1 physical property and 1 chemical property of Resins.

   f) What are commercial and medicinal uses of Volatile Oils?

   g) Give the complete biological source and uses of a plant containing flavonoids.

   h) Give the complete biological source and uses of an anti-cancer plant drug.

   i) What information we get from IR spectra?

   j) Give 2 major differences between TLC & HPTLC.

SECTION-B

2. Describe the biosynthesis of cardiac glycosides. What are the glycosides present in *Digitalis purpurea*?

3. What is spectroscopy and the applications of spectroscopic in the study of plant drugs?

4. Describe the chemical nature, isolation, identification, uses and industrial production of Taxol.

SECTION-C

5. What are the different methods that are used for investigation of biogenetic studies?

6. What are Saponins? Describe the constituents of Dioscorea.

7. Write a detailed note on structure, isolation and uses of Atropine.

8. Give an account on source, chemistry and industrial production of podophyllotoxin.

9. How can you identify cardiac glycosides and anthraquinones in a given sample of plants?

10. What are alkaloids? How are they classified?

11. Write a detailed note on green extraction processes.

12. Discuss the factors that influence choice of extraction methods.

13. Write a detailed note on Gel electrophoresis.
