Total No. of Questions : 13

B.Pharmacy (Sem.-5)

PHARMACOGNOSY AND PHYTOCHEMISTRY II-THEORY

Subject Code : BP504T

M.Code : 76789

Date of Examination: 28-11-2024

Time : 3 Hrs.

Max. Marks : 75

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.**

SECTION-A

1. Answer briefly:

a. Name the pathway and the starting compounds for the biosynthesis of phenylalanine.

b. What is the principle of Thin Layer chromatography?

c. Give the classification of cardiac glycosides.

d. Give complete biological sources of 2 plants that contain resins.

e. Which method will you use for extraction of volatile oils from plants?

f. What information can you get from IR spectra of a phytoconstituent?

g. Give the source and structure of an anticancer phytoconstituent.

h. What are the commercial applications of tannins?

i. Give the complete biological source and uses of a plant that contains Tropane Alkaloids.

j. Give the structure of major phytoconstituent present in Liquorice.

SECTION-B

2. Describe the biosynthesis of Steroidal Glycosides.

3. Describe the applications and advantages of different spectroscopic and chromatographic techniques in plant drug investigations.

4. Give a detailed account on types, sources, tests, therapeutic uses and industrial production of Saponin glycosides.

SECTION-C

5. Give the principle and applications of NMR Spectroscopy in study of crude drugs.

6. Give the principle, applications and limitations of Gas chromatography.

7. Compare black and pale catechu.

8. Give a detailed account on chemistry and uses of opium alkaloids.

9. Describe the industrial production, estimation and utilization of vinblastine and vincristine.

10. Describe the methods used to study biosynthetic pathways.

11. Write a note on 'green methods' of extraction.

12. Write a detailed note on isolation of constituents, uses and commercial applications of Mentha.

13. Describe the properties and classification of Glycosides.

NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student.
