**B.Pharma (2017 Batch) (Sem.-5)**

# MEDICINAL CHEMISTRY II- THEORY

**Subject Code : BP-501T**

**M.Code : 76786**

**Time : 3 Hrs.** **Max. Marks : 75**

**INSTRUCTIONS TO CANDIDATES :**

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains THREE questions carrying TEN marks each and student has to attempt any TWO questions.**
3. **SECTION-C contains NINE questions carrying FIVE marks each and student has to attempt any SEVEN questions.**

## SECTION-A

**1. Write briefly :**

a) Give the structure and chemical name of site II diuretic agent.

b) What are the therapeutic uses of Buclizine hydrochloride?

c) Give the name and structure of **any one** ACE inhibitor.

d) Why nitro vasodialators are used in angina pectoris?

e) What is the role of glucosidase enzyme? Give name of **any one** inhibitor.

f) Give the structure of **any two** sex hormones.

g) Give the structure of **any one** hydantoin derivative used as antiepileptic agent.

h) What is the moa and use of lansoprazole?

i) Outline the synthesis of benzocaine.

j) Write the structure and chemical name of anticoagulant which is phenindione derivative.

## SECTION-B

2. a) Classify Antineoplastic agents giving the structure of atleast one drug belonging to each category.

   b) Elaborate on the usage of plant products in treatment of cancers.

3. Give the chemical name, moa, the synthetic procedure and uses of the following drugs :

   a) Methyldopate hydrochloride

   b) Furosemide

4. Discuss in detail the chemistry of :

   a) Corticosteroids

   b) Drugs used in CHF

## SECTION-C

5. Explain the role of alpha and beta blockers in hypertension.

6. Write a note on Second generation H1 antagonists.

7. Write a short note on HMG coenzyme reductase inhibitors.

8. Give the moa and synthesis of methotrexate.

9. Comment upon "*stereochemistry and nomenclature of steroids*".

10. Comment upon "*the thiazolidine derivatives acting as antidiabetic agents*".

11. Discuss the chemistry of carbonic anhydrase inhibitors in detail.

12. Classify Antiarrythmic agents giving examples of each class.

13. Give the SAR of benzoic acid derivatives acting as anaesthetic agents.

**NOTE : Disclosure of Identity by writing Mobile No. or Making of passing request on any page of Answer Sheet will lead to UMC against the Student**.
